

Rauckman Utility Products Outage Protection devices are designed and tested to minimize animal related outages without compromising equipment performance. All of Rauckman's animal mitigation devices increase reliability while decreasing unplanned interruptions of service.

Rauckman Utility Products' Cutout Covers provide a wildlife barrier to protect against accidental contact outages by animals such as squirrels and birds. The covers are made from a specially formulated track resistant polymer specifically designed for the extreme requirements of the electric utility industry.

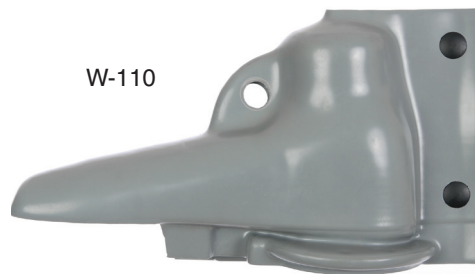

Model W-110 RUP Cutout Cover  
shown with RUP Stinger Cover

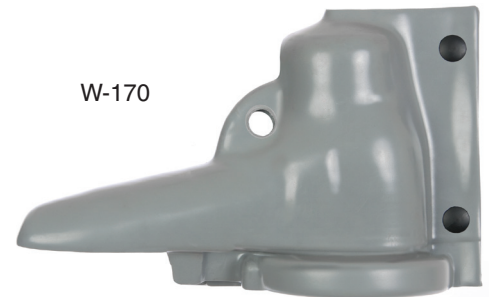

Both models are easily installed  
with rubber gloves.

Both models have shotgun stick eye.

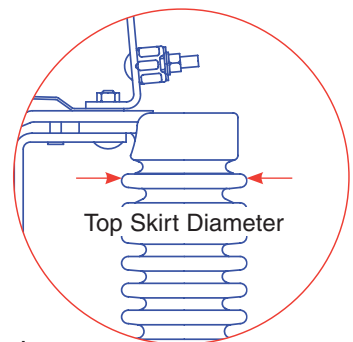

W-110

W-170

## FEATURES

- » High Ultra-Violet (UV) stability including Hindered Amine Light Stabilization (HALS)
- » Track-resistant high dielectric material remains stable even in the most severe environmental conditions
- » Flame Retardant properties meet the V-0 criteria of Underwriters' Laboratory Standard of UL-94 Flammability of Plastics
- » Fit major manufacturer's Porcelain and Polymer type cutouts
- » Fasteners used for closures are UV stabilized
